Rule A4 – Returned and Redirected Items

Introduction

1. (a) This Rule outlines procedures, timeframes and responsibilities whenever an Item is Exchanged for the purpose of Clearing and Settlement and payment is refused or cannot be obtained, and where the Drawee returns or redirects the Item through the same process. For requirements when an Image Printout, Clearing Replacement Document, Return Replacement Document, or an ICP File is used for the purpose of return, this Rule shall be read in conjunction with Rule A10.
- (b) Nothing in this Rule precludes a Drawee or a Negotiating Institution from exercising its rights and seeking recourse outside of the Rules. Before taking such actions, however, it is recommended that consideration be given to exercising any options available under Rule A6 or Rule A9.

Definitions

2. In this Rule,
 - (a) “Counterfeit Item” means a paper Item that appears to be original or genuine, but has been fraudulently made and, for the purposes of this Rule, shall be considered an Item with a Forged or Unauthorized Signature;
 - (b) “CRD or Image MICR Mismatch” means either an occurrence of the MICR encoding (excluding amount and CRD Identifier Code) contained on a Clearing Replacement Document not matching the MICR encoding represented in the Image on the Clearing Replacement Document, or an occurrence of the information included an ICP File not matching the MICR encoding represented on the associated Image of the payment Item.
 - (c) “Duplicate Payment Item” means an authorized Item that has been presented, for the purpose of payment, more than once. This may occur in situations where both an original and either an Image, Image Printout or a photocopy have been presented; an original item has been presented more than once; or where either an Image, Image Printout or a photocopy has been presented more than once.
 - (d) “Forged Endorsement” means an Endorsement in the name of the payee that is not made by that person or by someone authorized to sign on that person’s behalf, but does not include an Endorsement in the name of a payee when the payee name on the face of the Item has been altered without authorization;
 - (e) “Forged or Unauthorized Signature” means (i) a signature on the face of an Item that is not the signature of the person (the drawer) that it purports to be, or (ii) a signature that is written on or applied to an Item without the drawer’s authority;
 - (f) “Force Majeure” means any event beyond the control of an institution that could not be avoided by the exercise of such standard or care as is reasonable in the circumstances, including acts of God (earthquakes, natural floods, storms), fire, explosion, war, insurrection, riot, disaster, and civil disorder;
 - (g) “Image Missing or Not Usable” means an occurrence of all or part of the Image (front portion, back portion or both) on a Clearing Replacement Document or as presented electronically, being missing or where the Image is not Usable in accordance with Rule A10.

Rule A4 – Returned and Redirected Items

- (h) “Intended Payee(s) Not Paid” means that the named and Intended Payee(s) of a Payment Item did not receive the funds, but does not include Items where the Payee name on the face of the Item has been altered without authorization.
- (i) “Material Alteration” means an unauthorized change to one or more of the completed details of an originally authorized Item, and includes those material alterations identified in the Bills of Exchange Act, which are alterations:
 - (i) to the date,
 - (ii) to the sum payable,
 - (iii) of the time of payment,
 - (iv) of the place of payment, or
 - (v) of the addition of a place of payment without the acceptor’s assent where a bill has been accepted generally,

as well as any alteration of the Drawee or of the Payee name.

Scope

- 3. The procedures, timeframes and responsibilities set out in this Rule shall:

Reason for Return

- 4. Subject to the following exceptions, an Item may be returned by the Drawee pursuant to this Rule if, for any reason payment is refused or cannot be obtained:
 - (a) No Item shall be returned for the reason that the “words and figures differ” where the difference is twenty dollars (\$20) or less;
 - (b) A Drawee may not return an Item that it certified before the Item was Exchanged for the purpose of Clearing and Settlement, unless the Item is returned for the reason “Forged Endorsement”, “Intended Payee(s) Not Paid”, “Duplicate Payment Item”, “Item Incorrectly amount-encoded”, “Item Cleared in Wrong Currency”, “Image Missing or Not Usable”, “CRD or Image MICR Mismatch” or for the reason that the Item has been Materially Altered subsequent to certification; and

Greater Certainty: Redirected Items; Drawee Identification where Branch identified on Item has been sold; Items containing Forged or Unauthorized Signature and Forged Endorsement or where the intended Payee(s) was not paid

7. For greater certainty,
- (a) where a Drawee re-routes an Item due to the transfer of an account to another Branch, the timeframe for returns shall not be extended to accommodate this practice.

Rule A4 – Returned and Redirected Items

- (b) Where the Negotiating Institution has Exchanged an Item a second time, in contravention of subsection (a), the following procedures shall apply:

The Drawee shall not certify the Item nor enface the Item with the Item Dishonoured Stamp; and
- (b) An Item that has been returned for the reason “Item Cleared in the Wrong Currency” and Exchanged by the Negotiating Institution a second time in the correct currency may be subsequently returned by the Drawee for any other applicable reason (e.g., NSF, account closed) in accordance with CPA Rules.

Item Incorrectly Amount-Encoded

20. (a) An Item is deemed to be incorrectly amount-encoded when the MICR encoded amount differs from the amount written in figures on the face of the Item.
- (b) No Item incorrectly amount-encoded for a difference of \$20.00 or less shall be returned for the reason “Item incorrectly amount-encoded”.
- (c) Each Item incorrectly amount-encoded for a difference of over \$20.00 may be returned to the Negotiating Institution for the reason “Item incorrectly amount-encoded”, provided the item is returned within 90 calendar days of receipt by the Drawee. The Drawee shall not certify the Item nor enface the Item with the Item Dishonoured Stamp.
- (d) An Item that has been returned for the reason “Item incorrectly amount-encoded” and Exchanged by the Negotiating Institution a second time in the correct amount may be subsequently returned by the Drawee for any other applicable reason (e.g., NSF, account closed) in accordance with CPA Rules.

Words and Figures Differ

21. An Item may be returned to the Negotiating Institution for the reason “words and figures differ” where the MICR encoded amount differs from the amount expressed in words on the face of an Item, but is identical to the amount written in figures, provided the Item is returned within the timeframes stipulated in section 5.

Stale Dated Items

22. (a) Subject to subsection (b), each Item dated more than six months prior to presentment for payment may be returned unpaid for the reason “Stale Dated”.
- (b) Subsection (a) does not apply if the Item is a Bank Draft, Money Order, Certified Item, or Receiver General Warrant.

Note: Confirmation that such Items are still acceptable may be obtained by inquiry via fax or phone, or by sending the Item on collection.

Rule A4 – Returned and Redirected Items

Local Return Remote Areas

23. Where an Item is returned within a remote area, the Drawee Branch may:
- (a) give notice by telephone to the negotiating Branch of the pending return of the Returned Item, in which case the negotiating Branch may elect to collect the Returned Item in exchange for appropriate reimbursement; or
 - (b) return the Item accordance with Section 9.

Appendices

24. Appendices I, II, III, IV, V and VI shall be deemed to form part of this Rule.

Rule A4 – Procedures and Guidelines for Returned Item Carrier Envelopes

1. Introduction

This document sets out procedures and guidelines for Returned Item Carrier Envelopes (hereinafter referred to as “envelopes”) used for the processing of dishonoured Items.

(Note: Many of these procedures and guidelines may also be applied to document carrier envelopes used for the processing of damaged and other documents not processable through high speed automated cheque processing equipment.)

Many of these procedures and guidelines are based on the Check Carrier Envelope Specifications developed by the Accredited Standards Committee (ASC) X9 of the American National Standards Institute (ANSI). Although these specifications have been adapted to the Canadian environment, the ANSI terminology has been retained, wherever possible, to ensure consistency with ANSI documentation.

Copies of ASC X9 standards approved by ANSI as American National Standards can be obtained from the:

1.1 References

The envelopes described in this Appendix are also subject to CPA Standard 006, “Standards and Specifications for MICR Encoded Documents”.

2. Scope

This Appendix specifies the physical characteristics, dimensions and construction of envelopes.

3. Preamble

Envelopes reduce the need for manual processing. They are constructed to facilitate the handling of documents through high speed processing equipment.

4. Characteristics

4.1 Design

The face of the envelope shall be constructed of opaque bond paper which must meet the specifications defined in CPA Standard 006. The face of the envelope shall be printed with the information required for returning an Item as specified and provided by the purchasing institution.

A 1.59 cm (5/8”) area along the bottom edge shall be reserved for MICR encoding and shall not contain any informational printing. Recommended designs for envelopes are contained in Attachments I and II.

Rule A4 – Procedures and Guidelines for Returned Item Carrier Envelopes

The back of the envelope shall be constructed of a translucent sheet meeting the specifications listed below.

Where envelopes contain glue spots (see below), the translucent sheet, when viewed from the face, shall be bonded to the opaque sheet along the right hand edge and along a line immediately above the band reserved for MICR encoding. The top and left hand (non-leading) edges shall be open.

Where envelopes do not contain glue spots, the translucent sheet shall be bonded to the opaque sheet along the right and left hand edges and along a line immediately above the band reserved for MICR encoding. Only the top edge shall be open.

4.2 Envelope Size

All envelopes are to be rectangular in shape. The following minimum and maximum dimensions shall be adhered to:

	Length	Depth
Minimum	16.25 cm (6½ “)	7.5 cm (3⅛ “)
Maximum	21.87 cm (8¾ “)	10.8 cm (4¼ “) (MICR clear band included)

4.3 Colour

While colour specifications are not defined for the opaque paper parts described above, a white or light pastel coloured stock is recommended in order to provide maximum legibility.

4.4 Translucent Sheet

The translucent sheet shall have a thickness (.002”), weight and strength which will allow for visual analysis, microfilming or image capture of a document while inside the envelope. The use of plastic is not recommended as the endorsement stamp may not adhere properly and may therefore smear or be obliterated as the carrier envelope is processed through a reader/sorter. Any material which has a propensity to increase static, shall not be used. The following minimum and maximum specifications shall be adhered to:

	Minimum	Maximum
Basis Weight (lb.)	17.5	24
Caliper (Mils)	.0012	2.50
Cross Grain (G)	14	20
With Grain (G)	15	22
Smoothness (Sheffield) (U)		150/95
Porosity Gurley (Sec)		2000
Paper Terisile (lbs.)		20

Rule A4 – Procedures and Guidelines for Returned Item Carrier Envelopes

Opacity (%)	37	65
Brightness (%)		80.0
Curl (%)		3
Moisture (%)	5.0	7.0

4.5 MICR Encoding

The Transaction Code section of the On-Ups field on Returned Item Carrier Envelopes shall be encoded prior to clearing with the Returned Item transaction code (code 28).

5. Construction

Envelopes must be constructed such that they facilitate the handling of documents through automated cheque processing equipment.

5.1 Seams

The seams of the envelope shall be bonded such that they are able to withstand multiple pass machine processing (minimum 10 passes with a 24 lb. Cheque inserted). The bottom seam of the envelope shall not infringe upon the 5/8" clear band.

5.2 Glue Spots

a) Use of Glue Spots

The purpose of glue spots is to ensure that an envelope will carry an Item without the Item becoming separated from the envelope. Further information regarding the use of glue spots is contained in subsection 10(a) of this Rule.

b) Specifications

Where glue spots are used, one spot shall be located in the middle of the envelope and two spots shall be located one above the other in the upper corner of the open side (the non-leading edge) approximately 1" apart and 1" from the edge. The following requirements shall be met with respect to the amount of glue contained on the glue spots:

- envelopes shall pass an "open and remove item" test at least three times;
- envelopes shall have a minimum of six months "shelf life";
- no residue shall remain on a document upon its removal from the envelope;
- the glue shall be applied to and be contained within the interior surfaces of the envelope; and
- the glue shall not excessively impede removal of the document or cause any damage to the document when it is removed.

c) Testing Procedures

Suggested testing procedures for glue spot envelopes are outlined below:

- 1) Insert all cheque sizes.
 - ensure ease of handling

Rule A4 – Procedures and Guidelines for Returned Item Carrier Envelopes

- 2) Examine “glue spots” and make sure they meet the specifications outlined in subsections 5.2(b) above.
- 3) Encode the documents with transit, amount and Returned Item transaction code using an encoder that has been tested to ensure that it is encoding to CPA standards (i.e. no debossment, faint ink, etc., as poor encoding would be detrimental to testing).
 - observe MICR encoding for: quality, durability, and smearing
- 4) Subject the envelopes to a minimum of 10 passes through a reader/sorter.
 - watch for: jams, double-feed defects, damage, and empty envelopes
- 5) Examine any rejected items to determine cause.
- 6) Examine reader/sorter endorsements.
 - observe legibility or smearing
- 7) Examine microfilming or imaging.
 - observe image quality
