Part II outlines the technical requirements for Bill Payment Remittance Processing.
- (b) Nothing in this document is intended to require: any FI to participate in Bill Payment Remittance Processing as a Payor's FI or a Payee's FI for a particular Corporate Creditor; any entity to participate as a Corporate Creditor pursuant to this Rule; or any Corporate Creditor to allow a particular FI to collect its Remittances.
- (c) Nothing in this document is intended to preclude the establishment of agency relationships for the performance of particular functions, provided that such agents are required by agreement to comply with any relevant provisions of this Rule.

#### 1.2.6 DTM - Date/Time Reference

**Level:** Header

**Loop:** \_\_\_\_\_

**Usage:** **Mandatory**

**Max Use:** >1

**Purpose:** To specify pertinent dates and times.

With respect to electronic Remittances, five dates may be significant:

- (1) The date the Payor pays the Invoice (the Payment Date).
- (2) The date the Transmission is transferred from the Payor's FI (if an Indirect Participant) to the Originating Direct Participant.

**Rules Pertaining to the Inter-financial Institution  
Exchange and Settlement of Bill Payment Remittances**

- (3) The date the Transmission is transferred from the Originating Direct Participant to the Receiving Direct Participant.
- (4) The date the Transmission is transferred from the Receiving Direct Participant to the Payee's FI (if an Indirect Participant).
- (5) The date that value is given to the Corporate Creditor and Settlement occurs between FIs.

Possible scenarios are:

- (i) In the event that payment is made, the transmission is sent, value is given, and settlement is effected the same day (i.e., (1), (2), (3), (4) and (5) occur on the same day), the mandatory DTM - Date/Time Reference segments in the header created by the Originating Direct or Indirect Participant and the Receiving Direct or Indirect Participant shall be the same as the DTM segment in the RMR - Remittance Advice Accounts Receivable Open Item Reference loop, with the date taken from Data Element BPR16 - Effective Entry Date. In the first DTM in the header, the DTM01 - Date/Time Qualifier created by the Originating Direct or Indirect Participant shall be coded '097' (transaction creation). In the other DTM created by the Receiving Direct or Indirect Participant, the DTM01 shall be coded '107' (deposit).
- (ii) In the event that payment is made on one day, and the Transmission is sent, value is given, and Settlement is effected all on a later day, the DTM segments in the header created by the Originating Direct or Indirect Participant and the Receiving Direct or Indirect Participant shall be the date that the Transaction Set is created and the date it is posted to the Payee, respectively. The DTM segment in the RMR loop, coded '109' (received at lockbox), shall be the date the Payor paid the Remittance.
- (iii) In the event that the Transaction Set is processed on various days, each Financial Institution participating in the transaction shall add a DTM segment, coded '050' (received), if the date it is transmitting is different than the date of Transmission of the Originating Direct or Indirect Participant.

The following chart summarizes the possible scenarios, at all times assuming that all participants are EDI capable.

**2.0 SPECIFICATIONS FOR INTERCHANGE OF PAPER-BASED REMITTANCES**

**2.1 INTRODUCTION**

This section describes the specifications for the application of CPA Standard 006: "*Standards and Specifications for MICR Encoded Documents*", to paper-based Remittances. As such, it should be read in conjunction with CPA Standard 006. The following additions/exceptions shall be followed:

**2.2 MICR ENCODING ON REMITTANCES**

Detailed diagrams of the placement of information to appear in the MICR reserved area appear in Appendices I and II of Part II of this Rule. All specifications contained in CPA Standard 006 remain applicable; however layout changes are as follows:

- (a) Amount Field:** Character positions 11-2 inclusive shall be reserved for the Remittance Amount.
- (b) On-Us Field:**
  - i) Transaction Code Section:** Code 96, to indicate it is a Remittance, shall be located anywhere within the four positions of the Transaction Code Section. The remaining two positions shall be blank.
  - ii) Account Number Section:** Character positions 31-19 inclusive shall be reserved for Corporate Creditor Defined Data. It is an optional field at the discretion of the Corporate Creditor.
- (c) Transit Number Field:** Character positions 36, 35 and 34 (in this order) shall be the first three digits of the CCIN. Positions 42, 41, 40, 39, and 38 (in this order) shall be the last five digits of the CCIN. (*Note: Character position 36 shall be '9' in all cases.*)
- (d) Auxiliary On-Us Field:** Character positions 57-46 inclusive shall also be reserved for Corporate Creditor Defined Data. It is an optional field at the discretion of the Corporate Creditor.

This format allows the Corporate Creditor Defined Data to be placed in two fields of the MICR line. FIs shall first read data in the Auxiliary On-Us Field, followed by data in the Account Number Section.

**2.3 OCR ENCODING ON REMITTANCES**

OCR Encoding on Remittances is not mandatory and is not required for the exchange of Remittances between FIs. As such, Corporate Creditors may choose whether this line appears on the Remittance. However, if utilized, the encoding shall be in accordance with this Rule.

### Rules Pertaining to the Inter-financial Institution Exchange and Settlement of Bill Payment Remittances

A detailed diagram of the placement of information to appear in the OCR reserved area appears in Appendix II.

**(a) Content**

The content of the OCR line shall be Corporate Creditor defined information.

**(b) Reserved Area - OCR Encoding**

The reserved area shall be expanded by the addition of a further 3/8" (0.95 cm) band free of printing, colour and background.

**(c) Interline Spacing**

The top of the MICR characters shall be separated from the bottom of the OCR characters by a minimum of 1/4" (0.64cm).

**(d) OCR Spacing**

The OCR line shall be centred vertically in the Reserved Area - OCR Encoding. The vertical centerline of the rightmost character shall be no closer than 1/4" (0.64 cm) from the right-hand edge of the Remittance. The vertical centerline of the leftmost character shall be no closer than 1/4" (0.64 cm) from the left-hand edge of the Remittance.

**(e) OCR Font**

OCR-A. (ANSI X3.17, 1981) shall be the required font.

**(f) OCR Encoding Format**

The following format is laid out from right to left:

The rightmost character of the line shall be a Dash (-) to identify OCR-A as the font utilized in the remainder of the line to the left.

A minimum space of 1/4" (0.64cm) is required between the font identifier and the first character.

**(g) OCR Print Quality**

As set forth in ANSI X3.17, 1981: "*Print Quality for Optical Character Recognition*", ANSI X3.86, 1980 (R1987): "*Optical Character Recognition Inks*", and ANSI X3.93, 1981: "*OCR Character Positioning*".

**(h) Sample of OCR-A Font**

Type font is Multifont - Numeric only, a sample of which follows:

**Rules Pertaining to the Inter-financial Institution  
Exchange and Settlement of Bill Payment Remittances**

["." and "-" are short symbols, and "|" is a long vertical mark]

**2.4 HUMAN READABLE INFORMATION ON PAPER-BASED REMITTANCES**

The following mandatory data have been identified as minimum requirements for paper-based Remittances in order that the Payor's FI can effectively process payments. This data shall be human readable.

**(a) Corporate Creditor Information**

A legal or trade name which uniquely identifies the Corporate Creditor. It is recommended that this information also appear on the "Receipt".

**(b) Payor Information**

The Payor name, and/or a unique number assigned by the Corporate Creditor (Payor Identifier Number), to identify its customer. It is recommended that this information should also appear on the Receipt.

**(c) Amount Paid Area**

A clearly defined blank area on the Remittance portion labelled "Amount Paid" which shall be used to enter the Remittance Amount. This area shall be located away from any machine-readable encoding to avoid processing problems.

**(d) Payment Date**

The stamp of the Payor's FI to be applied to the reverse of the paper-based Remittance and the Receipt, if presented. It shall indicate the Payment Date as paid by the Payor.

**(e) Payable At**

Each Remittance shall bear a statement as to where the Payor may make payment.  
This information is optional on the "Receipt".
