APPENDIX II - FORM OF SET CONFIRMATION AND AUTHORIZATION TO DEBIT	5
APPENDIX III - STANDARD SETTLEMENT INSTRUCTIONS FOR RECEIVING LYNX SET MT 205 FUNDS AND DEBITING ACSS FUNDS	6

## **SETTLEMENT EXCHANGE TRANSACTION**

1. The Settlement Exchange Transaction (SET) is an intra-day exchange of funds transaction whose purpose is to deal with the dislocation of settlement funds between the Automated Clearing and Settlement System (ACSS) and Lynx. The SET involves a Lynx Participant sending Lynx funds to another Lynx Participant in exchange for ACSS funds on the same Business Day.

## **PARTICIPANTS**

2. Settlement Exchange Transactions are traded between direct Lynx Participants who also hold ACSS settlement accounts.

## **TRANSACTION TIMEFRAME**

3. Settlement Exchange Transactions are traded before the Lynx close of business at the end of Settlement Window 2.

## **TRADING MEDIUM**

4. It is recommended that SET trade details are agreed upon over taped telephone lines or other recorded means within the firms' standard trading procedure.

## **MT 205**

5. The SET counterparty with Lynx funds will initiate the transaction by sending an MT 205 with field 21 completed, as confirmation that the payment relates to a SET and reflects the terms thereof to the receiving Participant. (See example of a SWIFT MT205 in Appendix I). Failure to send an MT 205 will constitute a failure to meet the SET guidelines allowing the counterparty the option not to provide authorization to debit in ACSS.

## **MT 299**

6. Upon receipt of the Payment Message (MT 205), the Receiving Lynx Participant shall send a SWIFT MT 299 to the Sending Lynx Participant confirming the SET, acknowledging receipt of the Lynx Payment Message and confirming the authorization of the Sending Lynx Participant to enter an inter-member debit in the ACSS for that Business Day (An example of a SWIFT MT 299 is set out in Appendix II).

## **ACSS DEBIT**

7. An Inter-Member Debit (paper or electronic form) is to be used for the ACSS payment (pre-authorization given verbally when the SET is initially agreed to and confirmed through the MT 299). The Inter-Member Debit will settle in dedicated SET ACSS streams, RSET and NSET.

## SPLITTING OF SETS

8. The maximum dollar amount which can be MICR encoded on paper items for settlement in ACSS is \$99,999,999.99. Any SET in the amount of \$100 million or greater must be split into multiple debits to allow for proper MICR encoding. The maximum amount for each Inter-Member Debit is \$90 million. For example, a SET for \$350 million is split into 4 separate debits 3 x \$90 million and 1 x \$80 million.

## LOCATION OF SET STAMP

9. The Lynx Participant that creates the Inter-Member debit for the ACSS payment shall place a stamp with the word "SET" in the field that corresponds with field 21 (related reference/details) from the MT205. The Participant must also include the Lynx transaction reference number in field 20 (Transaction Reference Number) of the SET. This will ensure that the SET can be easily and consistently identified.

## SET CONFIRMATION

10. Lynx Participants may choose to rely on "post confirmation of the exchange" where time constraints warrant such an approach.

## INTEREST RATE

11. SETS are designed to be used as a liquidity management tool and not subject to interest rates or fees.

## APPENDIX I - EXAMPLE OF SET MT 205

Status	Tag	Field Name	Example
User Header	103:108	103 Service Code (CAD) 108 Tranche Designation (1 or 2 or blank)	SNDRCAT2 205RCVRCAT2 103:CAD 108:2
M	20	Transaction Reference Number	(sender's reference)
M	21	Related Reference	
M	32a	Value Date/Currency Code/Amount	211012CAD12000000,00
M	52a	Ordering Institution	SNDRCAT2
O	56a	Intermediary	
O	57a	Account With Institution	

M	58d	Beneficiary	/XXXXXXX* BANK NAME, CITY, PROVINCE, COUNTRY
O	72	Sender to Receiver Information	

M – Mandatory

O – Optional

\* a list of the standard settlement instructions is attached as Appendix III

## **APPENDIX II - FORM OF SET CONFIRMATION AND AUTHORIZATION TO DEBIT**
